

Acknowledgments

The research leading to the results published in this article was founded by the Swiss National Science Foundation (SNSF) grant No. 205320-120118 and the European Community's Seventh Framework Programme under the grant agreement No. 216105 (Real 3D). The authors would like to thank especially Etienne Shaffer, Jonas Kühn, Yves Delacrétaz and their colleagues in the Microvision and Microdiagnostics Group (MVD) and in Lyncée Tec SA (www.lynceetec.com) for their cooperation and several discussions.
